

AERA Announces a New Book on
Estimating Causal Effects

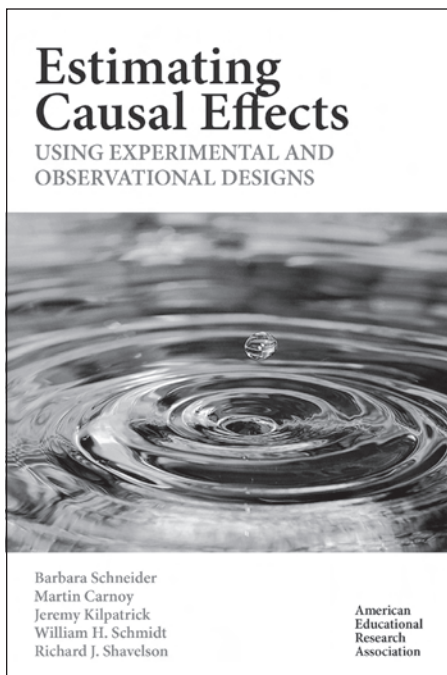

Authored By

Barbara Schneider, Martin Carnoy, Jeremy Kilpatrick, William H. Schmidt, Richard J. Shavelson

A think tank white paper prepared under the auspices of the AERA Grants Program.

Key Issues

- Causality: Forming an Evidential Base
- The Logic of Causal Inference
- The Formal Specification of the Causal Inference Model
- Criteria for Making Causal Inferences
- Issues in the Design and Fielding of Randomized Experiments
- Estimating Causal Effects Using Observational Data
- Methods for Approximating Randomized Assignment
- Analysis of Large-Scale Datasets: Cases of NSF-Supported Research

Order from the American Educational Research Association

Online: <http://www.aera.net>

By Phone: (202) 223-9485

Price: \$21.95 (Members)

\$26.95 (Non-members)
